# Ubuntu on Dell OptiPlex 7050

## Feedback

If there is an issue with the information for this system, please [let us know](#).

The **Dell OptiPlex 7050** desktop with the components described below has been awarded the status of certified pre-install for Ubuntu.

### Please note that for pre-installed systems:

1. The system is available in some regions with a special image of Ubuntu pre-installed by the manufacturer. It takes advantage of the hardware features for this system and may include additional software. You should check when buying the system whether this is an option.
2. Standard images of Ubuntu may not work at all on the system or may not work well, though Canonical and computer manufacturers will try to certify the system with future standard releases of Ubuntu.

## Ubuntu 16.04 LTS 64-bit

Pre-installed by manufacturer

### Certification notes

There are no notes for this release.

BIOS

Dell: 0.6.0 (UEFI)

## Hardware summary

This system was tested with these key components:

Processor [Intel Intel\(R\) Core\(TM\) i5-7400T CPU @ 2.40GHz](#)

Ethernet [Intel Ethernet Connection \(5\) I219-LM](#)
